

TPS GREENWORKS

A TPS Worksite Solutions(TM) business

Civil Erosion Support Planting

Coordinated vegetation delivery for batters, embankments, drainage corridors and civil reinstatement areas.

Vegetation options for erosion support - Species are selected around the approved design, slope conditions, soil profile, drainage, maintenance requirements and project specifications.

LOMANDRA

Dense clumping for batter planting

KANGAROO GRASS

Native grass for rehabilitation

VETIVER GRASS

Contour rows where specified

CREEPING BOOBIALLA

Low spreading groundcover

JUTE MATTING

Surface protection during establishment

COIR ROLLS AND LOGS

Bank and toe erosion support

TPS Greenworks can coordinate the vegetation package

- Plant schedules and sourcing
- Jute matting installation
- Coir roll supply and installation
- Batter and embankment planting
- Maintenance and replacements
- Establishment reporting

JUNCUS USITATUS

Wet zones and drainage lines

CAREX APPRESSA

Sedge for moist rehabilitation areas

FICINIA NODOSA

Coastal and periodically wet sites

POA LABILLARDIEREI

Tussock cover for suitable batters

HARDENBERGIA

Spreading cover for drier slopes

GREVILLEA ROYAL MANTLE

Dense groundcover where specified

Add vegetated erosion support to your civil project

Ask TPS Greenworks to review the planting, procurement and establishment requirements.
